Make your own tea bag.

TEACUP ♥ filters are made from compostable naturfine® paper, which consists of 100% natural fibers and is FSC® certified.

MORE TASTE

These filters allow for a true-flavor extraction. Enjoy the full aroma and the fine color of your favorite teas with the **TEA**CUP ♥ filters.

MORE CHOICES

Choosing the right loose-leaf tea remains up to you. Make your own blend of teas and herbs with **TEA**CUP ♥ filters.

LESS WASTE

The extensive packaging of tea bags results in a material and carbon footprint which's almost x times higher than for loose-leaf tea.

TEACUP ♥ filters are made from compostable naturfine® paper and packed in a recycled box material. The filters and it's box are FSC® certified.

LESS COSTLY

Tea bags go through far more packaging procedures than the loose-leaf tea. This also has an impact on costs. With **TEA**CUP ♥ filters you save on price, not on quality.

FOR USE IN:

{EN} TEACUP ♥ filters are made from compostable naturfine® paper, which consists of 100% natural fibers and is FSC® certified.

Follow the icons. Carefully pour hot water over the tea. Discard the spent tealeaves with the filter. Keep the „Filter Stick" for later use.

{DE} TEACUP ♥ Filter werden aus kompostierbarem naturfine® Papier hergestellt, das zu 100 % aus Naturfasern besteht und FSC® zertifiziert ist.

Befolgen Sie bitte die Anweisungen auf den Bildern. Gießen Sie das heiße Wasser vorsichtig über den Tee. Nach Gebrauch entsorgen Sie nur den Papierfilter mit dem Tee. Der Stick wird wiederverwendet.

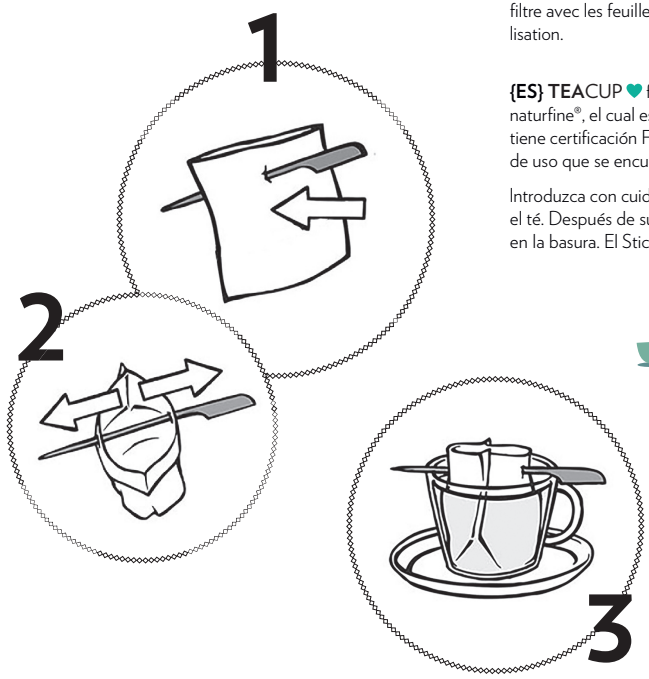

{FR} TEACUP ♥ filtres sont fabriqués à partir de papier naturfine® compostable, composé à 100 % de fibres naturelles et certifié FSC®.

Suivez les instructions des images. Versez avec précaution l'eau frémissante sur le thè. Après usage élimenez le filtre avec les feuilles de thé. Gardez le stick pour la réutilisation.

{ES} TEACUP ♥ filtros son de papel compostable naturfine®, el cual está hecho al 100% de fibras naturales y tiene certificación FSC®. Siga por favor las instrucciones de uso que se encuentran en las imágenes.

Introduzca con cuidado el agua caliente sobre el té. Después de su uso, elimine la bolsa de papel con té en la basura. El Stick (Palillo) es reutilizable.

FOR USE IN:

Are you aware of our comparable solution, the ONE ♥ CUP coffee filters?

♥ NATURAL FIBERS ♥ COMPOSTABLE ♥ GMO-FREE

Your favourite coffee deserves the best possible preparation.

It is achieved with the infusion in the **ONE**CUP ♥ filter.

You can now see it for yourself.
Please have a first glance at the brief introduction video which we have placed online at **www.onecupfilter.com**

Using a mug instead of a cup**?**
Just add more coffee**!**

A longer infusion time does not affect the good taste.

{EN} ONECUP ♥ **coffee filters** are made from compostable naturfine® paper, which consists of 100% natural fibers and is FSC® certified.

Squeeze the ring of the mount. Place the paper filter over the ring spikes. Then release the ring tension. Take 1 coffee scoop of ground coffee (7-10g) add hot water (just not boiling). Leave to infuse for 1 minute or longer while dipping 2-3 times. Lift slowly with an inclination of the handle to allow dripping off along the seam. **Enjoy!**

{DE} ONECUP ♥ **Kaffeefilter** werden aus kompostierbarem naturfine® Papier hergestellt, das zu 100% aus Naturfasern besteht und FSC® zertifiziert ist.

Den Ring der Halterung zusammendrücken. Den Papierfilter über die Ringdornen stülpen. Dann die Ringspannung lösen. 1 gehäufter Esslöffel gemahlenen Kaffees (7-10g) und heißes Wasser (nicht kochend). 1 Minute oder länger ziehen lassen dabei 2-3 malig eintauchen. Danach mit geneigtem Griff langsam herausziehen und an der Naht abtropfen lassen. **Genießen!**

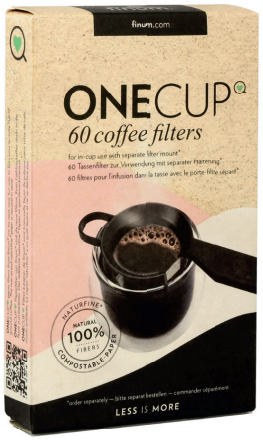

{FR} ONECUP ♥ **filtres à café** sont fabriqués à partir de papier naturfine® compostable, composé à 100 % de fibres naturelles et certifié FSC®.

Serrez l'anneau sur le support. Mettez le papier filtre sur les pointes de la anneau. Ensuite, relâchez la tension sur la bague. 1 cuillère doseuse de café moulu (7-10g). Ajoutez de l'eau chaude (pas bouillante). Laissez infuser pendant 1 minute ou plus tout en trempant 2-3 fois. Puis avec une inclinaison. Tirez lentement la poignée et égouttez sur la couture. **Prendre plaisir!**

{ES} ONECUP ♥ **filtros de café** son de papel compostable naturfine®, el cual está hecho al 100% de fibras naturales y tiene certificación FSC®.

Aprieta el anillo del soporte. Pon el filtro de papel sobre las puntas del anillo. Luego libera la tensión del anillo.
1 cucharada de café molido (7-10g). Agrega agua caliente (por debajo del punto de ebullición). Dejar en infusión durante 1 minuto o más mientras se sumerge 2-3 veces. Levantar el soporte lentamente con una inclinación del mango para permitir el goteo a lo largo de la costura del filtro. **¡Disfrutar!**

Make the most of your Coffee!

COLDBREW ♥ coffee filters are made from compostable naturfine® paper, which consists of 100% natural fibers and is FSC® certified.

COLDBREW ♥ filters bring out an incredibly balanced taste, every time. Discover the nutty and floral nuances of the coffee.

You don't even need any equipment beyond a glass container and the finum **COLD**BREW ♥ filter with the reusable CLICK.

Take 60-70g of your favorite ground coffee (coffee to water ratio 1:15).

Fill the **COLD**BREW ♥ filter so that the top third remains free (approx. 6cm or 2.5" unfilled). Lock it with the CLICK and attach it to the glass container.

Pour cold drinking water in the container (0.9- 1L).

Then let it infuse overnight, or for 12 to 24 hours, according to desire.

Toss the compostable **COLD**BREW ♥ filter into the organic waste garbage can and keep the stainless-steel CLICK for your next brew. Put a lid on the ready-to-drink coffee.

Our suggestion: Make around 1 liter in the evening and stash it in the fridge for an easy coffee fix throughout several days. You can serve and drink it right away. Furthermore you can serve it over ice or warm it up in the microwave for a hot cup.
