NATURAL FIBER FILTERS

## FLIP XS-XL

The **finum**® disposable tea filters of natural FSC®-certified fibers, come in various sizes – perfect for any cup or large pot. A convenient “filling flap” prevents the mess while filling in the tea. These tea filters can also be used without a filter holder as the filling flap facilitates the removal of the filter after brewing. Due to their natural fibers (abaca pulp and cellulose), these tea filters are biodegradable. Their unique true-flavor filtering qualities and the absence of glue or any other binding agent add to their eco-friendly character.

NATURAL FIBER FILTERS

# ABOUT FINUM

## Sustainability and Excellence

**finum®** is dedicated to the development and production of filters and accessories for the manual preparation of tea and coffee - more taste and a careful use of the natural resources.

Sustainability is part of our DNA; it includes efficiency, environmental action and our responsibility for the whole. Our customers, our employees and our suppliers are at the center of everything we do.

Say goodbye to overly packaged, unsustainable coffee capsules and teabags and enhance your offer with the compostable finum filters for less waste and more taste.

**Riensch & Held - founded in 1845 – efficient, innovative and sustainable!**

**finum®** is the brand of German filter manufacturer Riensch & Held GmbH & Co. KG from Hamburg. The company was originally founded in 1845 as an international trading company between Europe and the Americas. The US subsidiary Finum North America Corp. is incorporated in New Jersey.

The Hamburg-based filter products are also available to consumers all over the world as OEM components, i.e. as water filters in coffee machines and as private label products from renowned retailers and brands.

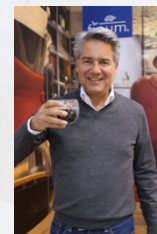

The manufacturing plant of Riensch & Held GmbH & Co. KG is certified according to DIN ISO 9001:2015 as well as FSSC 22000.

As a member of the Hamburg Environmental Partnership, we are committed to voluntary measures for environmental and climate protection.

By systematically identifying and implementing effective ones, we are meeting our responsibility for the whole.
