TEA BREWERS

TEA CONTROL WITH STAINLESS STEEL KNOB

The stylish TEA CONTROL™ 0.8L with brew-control – perfect for hospitality.

Presented with the prestigious red dot Design Award and the GOOD DESIGN™ award in 2010, these brewers are equipped with the patented brew-control mechanism – a simple turn of the lid corners the tea leaves and slows the brewing process. With the TEA CONTROL™, your loose-leaf tea can remain in the heat-resistant glass without compromising the flavor by becoming bitter. It also allows for multiple brews. Enjoy delicious tea from the first to the last cup!

ABOUT FINUM

Sustainability and Excellence

finum® is dedicated to the development and production of filters and accessories for the manual preparation of tea and coffee - more taste and a careful use of the natural resources.

Sustainability is part of our DNA; it includes efficiency, environmental action and our responsibility for the whole. Our customers, our employees and our suppliers are at the center of everything we do.

Say goodbye to overly packaged, unsustainable coffee capsules and teabags and enhance your offer with the compostable finum filters for less waste and more taste.

Riensch & Held - founded in 1845 – efficient, innovative and sustainable!

finum® is the brand of German filter manufacturer Riensch & Held GmbH & Co. KG from Hamburg. The company was originally founded in 1845 as an international trading company between Europe and the Americas. The US subsidiary Finum North America Corp. is incorporated in New Jersey.

The Hamburg-based filter products are also available to consumers all over the world as OEM components, i.e. as water filters in coffee machines and as private label products from renowned retailers and brands.

The manufacturing plant of Riensch & Held GmbH & Co. KG is certified according to DIN ISO 9001:2015 as well as FSSC 22000.

As a member of the Hamburg Environmental Partnership, we are committed to voluntary measures for environmental and climate protection.

By systematically identifying and implementing effective ones, we are meeting our responsibility for the whole.
